

ADITYA KUMAR CHOUDHARY

Full Stack Developer | MERN Stack Developer

+91-9102141837 | kadiya39546@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer skilled in building production-ready MERN stack applications, with hands-on experience in REST API design, JWT-based authentication, role-based access control (RBAC), and responsive UI development using React.js, Node.js, Express.js, and MongoDB. Comfortable architecting backend systems end-to-end — from database schema design to secure API integration — and translating real-world problems into deployed, working products. Smart India Hackathon 2025 National Finalist, selected among 50,000+ teams nationwide for technical problem-solving under competitive constraints.

TECHNICAL SKILLS

Languages: JavaScript, Java, C

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT, bcrypt, MVC

Database: MongoDB, Mongoose

Tools: Git, GitHub, VS Code, Postman, Render

Concepts: Authentication, Authorization, RBAC, REST API Design, Component Architecture, Database Design, Input Validation, Responsive Design

FEATURED PROJECTS

InstantSeva | React, Node.js, Express, MongoDB, JWT, Maps API

[GitHub](#) | [Live Demo](#)

- Architected a hyperlocal service marketplace connecting customers and service providers through separate role-based dashboards built with React.js and a Node.js/Express.js backend.
- Implemented JWT-based authentication with role-based access control (RBAC) to enforce distinct permissions across customer, provider, and admin roles.
- Built a location-aware booking system integrated with a Maps API to support real-time service discovery and scheduling.
- Designed MongoDB schemas and secure REST APIs to manage bookings, provider listings, and user profiles with structured input validation.
- Integrated payment functionality across customer, provider, and admin dashboards, and deployed the application live on Render.

AAR GLOBE | React.js, Node.js, Express.js, MongoDB

[GitHub](#) | [Live Demo](#)

- Developed a business management and e-commerce platform supporting product listings, inventory tracking, and service management on a modular MERN architecture.
- Designed an admin dashboard for real-time management of products, inventory, and services backed by MongoDB.
- Engineered secure backend APIs with structured request validation and a modular route/controller layout to support scalable feature growth.
- Built a responsive React.js UI to ensure a consistent experience across desktop and mobile devices.
- Deployed the application on Render with a production-ready build configuration.

AgroX | MongoDB, Express.js, Node.js, AI Integration

[GitHub](#)

- Built an AI-powered crop intelligence platform combining backend APIs with crop recommendation and disease detection capabilities.
- Integrated weather data into the recommendation pipeline to generate context-aware, environment-based crop suggestions.
- Designed MongoDB schemas and backend APIs to securely store and process crop, weather, and detection data.
- Implemented input validation and secure architecture practices to maintain data integrity across API endpoints.
- Connected AI-driven prediction outputs to a structured backend data pipeline for crop and disease insights.

SafeNest | MongoDB, Express.js, Node.js, JWT, RBAC

[GitHub](#)

- Built a workforce safety management platform for incident reporting and inspection tracking using the MERN stack.
- Implemented JWT authentication with role-based access control (RBAC) to separate permissions for workers, inspectors, and administrators.
- Designed an incident reporting module and inspection management workflow backed by MongoDB and Express.js APIs.
- Built a centralized dashboard to track safety incidents and inspection status across the organization.
- Structured backend routes and controllers following MVC architecture for maintainability.

ACHIEVEMENTS

- Smart India Hackathon 2025 — National Finalist (Top 0.1% among 50,000+ teams)
- BPUT Hackathon 2025 — First Runner-Up
- NIT Rourkela Innov-a-thon 2025 — Finalist

EDUCATION

B.Tech, Computer Science Engineering — GIET University

2024 – 2028

CGPA: 7.97 / 10

CERTIFICATIONS

Certifications: HTML5 App Development Fundamentals, React Development, Git & GitHub Fundamentals, Google AI-ML Program
